Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-40 and 58-69 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-33, 58-62 and 94-101 of copending Application No. 10/005,529, claims 1-64 and 86-114 of copending Application No. 10/150,771 and claims 1-30 of copending Application No. 10/150,770. Although the conflicting claims are not identical, they are not patentably distinct from each other because both are directed to a sample carrier comprising a structural array having a plurality of node, optically labeled identification means and means to control/locate each sample.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1743

Claims 17-19, 38-40 and 68 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims are not clear what structure is intended by derivatized. For the purpose of examination, it will be assumed some type of surface modification is intended.

Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1-40 and 58-69 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Milosavljevic et al.

See the appropriate paragraph of the 8/27/04 Office action.

Claims 1-14,20-35, 58-66 and 69 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hogan (WO 01/31317 cited by Applicant).

See the appropriate paragraph of the 8/27/04 Office action.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 15-19,36-40 and 67-68 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hogan.

See the appropriate paragraph of the 8/27/04 Office action.

Election/Restrictions

Art Unit: 1743

Applicant's request for reconsideration of the election with traverse of group I in the reply filed on 1/18/05 is acknowledged. Applicants' traversal generally stated the instant amendments obviate the earlier restriction requirement and there would be no additional burden of search. The 1/18/05 amendments do not address the specific point of the restriction and are not convincing. Also the criteria for restriction are independent inventions, not burden of search. Finally, the restriction requirement has been made FINAL in the 8/27/04 response and no further consideration is required.

Response to Arguments

Applicant's arguments filed 1/18/05 have been fully considered but they are not persuasive.

Applicants' "node" has been clearly described in the specification and defines over the structures taught by the cited prior art. The Office has read the claimed node as any means to contain a sample. Applicants further state the cited prior art does not teach sample node that contain discrete samples. The Office maintains the cited art teaches discrete sample placed into unique and discrete containers for subsequent analysis which is indistinguishable from the instant claims.

Applicants' traverse the 35 USC 103 rejections on the basis the reference fails to teach each and every limitation of the claims. The Office maintains the rejection of record addresses all of the claimed limitations. It would be helpful if Applicants' were to specifically point out what feature of the rejection they are taking issue with.

Art Unit: 1743

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
